

Hybrid General Task Heavy A/B Public Report

Executive Summary

This public report evaluates the locked hybrid strategy on a fresh 4x3 heavy benchmark of general-purpose tasks.

The matrix is intentionally non-ACL-X-centric and measures structured task execution across all four tiers.

Release recommendation: GO.

Benchmark Basis

Run ID: 20260415_110636_t2_refresh

Strategy lock: aclx-strategy-freeze-2026-04-14-t0-t1-stable

Generated at: 2026-04-15 11:06:36

Matrix size: 12 tasks across t0/t1/t2/t3.

Baseline failed tasks: 0.

Aggregate Outcome

Baseline total tokens: 167281

Hybrid total tokens: 114125

Aggregate token improvement: 31.78%

Baseline total time: 686.96s

Hybrid total time: 315.18s

Aggregate time improvement: 54.12%

Baseline average quality: 99.25

Hybrid average quality: 100.00

Quality delta: 0.75

Tier Aggregates

Tier	Tasks	Baseline Tokens	Hybrid Tokens	Token Improvement	Baseline Time	Hybrid Time	Time Improvement	Baseline Quality	Hybrid Quality
t0	3	25563	23719	7.21%	52.55s	50.77s	3.38%	100.00	100.00

Hybrid General Task Heavy A/B Public Report

Tier	Tasks	Baseline Tokens	Hybrid Tokens	Token Improvement	Baseline Time	Hybrid Time	Time Improvement	Baseline Quality	Hybrid Quality
t1	3	49123	29085	40.79%	258.67s	85.90s	66.79%	100.00	100.00
t2	3	59416	30742	48.26%	225.69s	87.20s	61.36%	100.00	100.00
t3	3	33179	30579	7.84%	150.06s	91.31s	39.15%	97.00	100.00

Task Matrix

Tier	Group	Task	Baseline Tokens	Hybrid Tokens	Token Improvement	Baseline Time	Hybrid Time	Time Improvement	Baseline Quality	Hybrid Quality
t0	1	Store pickup brief	8476	8246	2.71%	20.97s	17.46s	16.76%	100	100
t0	2	Meeting capacity brief	8543	8275	3.14%	15.90s	16.19s	-1.83%	100	100
t0	3	Field outage note brief	8544	7198	15.75%	15.68s	17.13s	-9.23%	100	100
t1	1	Blank shipment code review	16009	9756	39.06%	75.15s	29.95s	60.15%	100	100
t1	2	Zero attendee review	16124	9582	40.57%	98.15s	30.11s	69.33%	100	100
t1	3	Unknown locker review	16990	9747	42.63%	85.37s	25.84s	69.73%	100	100
t2	1	Delivery slot repair	22400	10388	53.62%	70.95s	29.55s	58.35%	100	100
t2	2	Maintenance window repair	22790	10341	54.62%	66.18s	32.32s	51.17%	100	100
t2	3	Shift label repair	14226	10013	29.61%	88.56s	25.33s	71.40%	100	100
t3	1	Warehouse cycle count playbook	10354	10228	1.22%	49.30s	27.95s	43.30%	100	100
t3	2	Vendor maintenance handoff guide	11560	10216	11.63%	51.14s	31.67s	38.07%	100	100
t3	3	Site readiness manual	11265	10135	10.03%	49.62s	31.69s	36.13%	91	100

Interpretation and Limits

The validated claim is bounded to structured general tasks with explicit artifacts, validators, and closure conditions.

This is not a blanket guarantee for arbitrary open-ended work.

Public release evidence requires aggregate token and time advantage with no average quality regression.

Conclusion

Within the validated benchmark scope, the locked hybrid strategy is suitable for public release.
